### **Product Description**

Pureasol is a new company that provides the solution to all shoe-wearer's problems. We have created a spray on sole protector that enhances the lifespan of all types of shoes. Our solution involves using an ionized rubber polymer in aerosol form that reacts with oxygen to form a flexible, protective coating over the sole of the shoe. Pureasol offers customers many advantages over products sold by competitors. We differentiate ourselves by offering a product that is easy to use: simply spray our product on your shoe to protect against dirt, water, and other forces that would wear down the sole. Pureasol also offers other bonuses such as enhanced grip on sports shoes. Pureasol can be used on any type of shoe with a sole for a very affordable \$10 per can. Pureasol is the most convenient and long lasting shoe protectant on the market.
