Company Description:

At PetPoint we created a solution to know where cats and dogs are at all times. Pet owners don't need to worry about putting signs around the neighborhood or posting a facebook message about their lost pet. Now with PetPoint, owners will be able to track their pets with a GPS chip embedded in a collar featuring multiple designs to suit your pet's personality. The collar will connect to our PetPoint app on iPhone and Android systems allowing them to see exactly where their pet is and provide directions to their location. Petpoint can solve a global issue and ensure the safety of cats and dogs by pinpointing animals anywhere and anytime! Additionally, PetPoint has expanded to sell pet clothing, costumes, and merchandise. With this new product line PetPoint will not only find your animal but allow them to look great too.
