Business Description

Founded in August of 2018, Aromabai was established as an S Corporation. Our company specializes in assisting customers to wake up smoothly in the morning through the use of an alarm clock that wakes you up by dispensing a scent. This revolutionary concept came about in the small town of Visalia, California. Traveling throughout the country, CEO, Christian Urbina has networked with a handful of the population, and has recognized the way in which different cultures start and end their day. This in return, ignited the idea of the Aromabai clock, and has brought together an enlightened community throughout the nation.

CEO Christian Urbina
