Company Description

Arctic+ is a small appliance company located in Bethalto, IL. We specialize in mini-refrigerators with matching attachments. Because of our unique design, adjustable shelving and movable door bins, our quality mini-fridges hold more than our competitors. Our energy efficient mini fridges also feature an advanced cooling technology that assures perishables are stored without worry of spoiling. The locking mechanism keeps your food and beverages safe from theft. We are the only company that offers matching attachments that can be stacked on top of our mini-fridges to create an aesthetically pleasing uniform look. No need to have a toaster oven, microwave, or freezer sitting on a separate table when you can stack coordinating attachments to the top of our mini-fridges.
