History In The Making

LOGO

COLORS

We chose purple and gold as our accent colors because we felt they were regal, they symbolize the royal treatment you'll receive at H.I.T.M. Records.

FONTS

H.I.T.M. RECORDS

HISTORY IN THE MAKING - ROCK SALT

Recording studio for aspiring artists - Caveat

Our fonts convey a more spontaneous message to people who are trying to start a career in music. We have a free way of doing things that puts no pressure on the person recording so we can have an easy, relaxed time when we are in the studio. Our fonts are informal because we want people to feel comfortable working with us. We feel a handwriting font is more appropriate for the image we are trying to convey.

LETTERHEAD

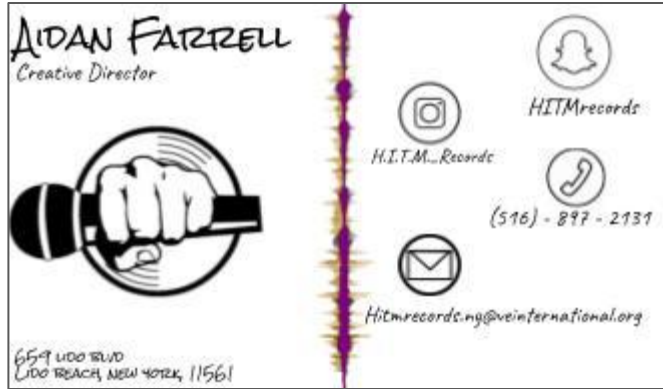

We are a limited liability company that came together in hopes of providing a platform to give other kids our age somewhere to let their voices be heard. Our establishment offers package deals for all different types of artists. We offer services like production classes for people who are not experienced however, for independent artists, we provide the setting to make their own music.

Our ideal clients will be artists of all diversity and also people willing to learn the craft. The difference between us and other studios is that we value originality so our artists can feel free to express themselves however they feel on our mics. We encourage artists to come as they are.

Our end goal is excellence and success! When they are done with their song, they have the opportunity to go to the music video room to create a visual to their piece. We at HITM want to give individuals with talent an experience of professional facilities and services. We hope to achieve all the recording goals and dreams of every last one of our clientele!
