Dear Consumers,

World Wide Water is a company created around the idea of obtaining an endless reservoir of pure, healthy water. Our drive stems from the desire to benefit our customers, the environment, and everything in between. We are dedicated to providing the cleanest and eco-friendliest water station, accompanied by an advanced, reusable water bottle. In addition, a portion of the profits we make from Worldwide Water will go to less fortunate areas in need of clean water. Our goal is to make sure clean filtered water is distributed throughout public facilities and raising awareness for polluted areas with no access to clean water. With our consumers help we'll make it our top priority to provide a cleaner environment for all. Along with the many benefits brought to our consumers, we'd like to say Worldwide Water is truly a company of a new utopian world.

Sincerely,  
**WorldWide Water Team**

## What is WorldWide Water?

WorldWide Water is a company created around the idea of obtaining an endless reservoir of pure, healthy water. Our drive stems from the desire to benefit our customers, the environment, and everything in between. We are wholeheartedly dedicated to providing the cleanest and most eco friendly water station, accompanied by an advanced, reusable water bottle. In addition, a portion of the profits we make from WorldWide Water will go to countries in need of clean water. WorldWide Water is truly a company of Utopian tomorrow.

*Water is the New Wave, Put the World In Your Cup!*

EDUCATIONAL PURPOSES ONLY

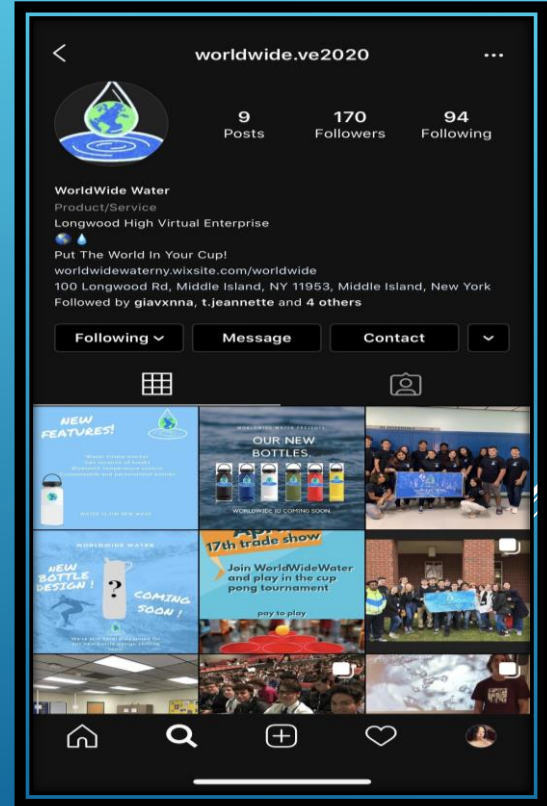

*WorldWide Water is a company that plans to stand out from all other corporations. We have major goals that we look to accomplish. One of these goals is to unite the world with our vast target market. This target market that I have spoken about is for people that drink water, are on the go, and care for their environment. As we expand as a business, we look to expand our sales to all around the world. Our products create a better standard of living with the use of our healthy alkaline water. We have a high tech*
