CORPORATE NEWSLETTER

COMPANY OVERVIEW

Founded in 2014 at Francis Lewis High School, Relmagine3D targets creative individuals seeking to express their ideas through unique products. With our 3D printers, we have the advantage of printing tangible everyday products for our consumers. At Relmagine3D, we have established a healthy environment where employees can comfortably learn and grow, leading to ultimate success.

MISSION STATEMENT

At Relmagine3D, our mission is to accelerate the future and instigate creativity in the next generation by inspiring and empowering people to be innovative.

VISION STATEMENT

With ambition and innovation, Relmagin3D intends to converge the virtual and physical world by opening the promise of 3D printing to all, leading the third industrial revolution.

3D INDUSTRY TRENDS

3D printing is a growing trend. People are now advancing in metal 3D printing, rather than just plastic filament. This would allow people to prototype with quality materials. 3D printing is also widely used in the medical field. With 3D printing, we are able to create hearing aids, hip implants, and even prosthetics. The growing industry would allow for cheaper and faster materials for future advancements.

TIPS AND TRICKS TO SUCCEED

1. When it comes to hiring people, companies will trust their employees. If they're the right person, they'll do a great job. So be 100% committed or don't do it.
2. Don't burn out. Your health is the most important thing. No matter how committed you are to your business, remember to take care of yourself.
3. Surround yourself with the right people. Build a staff that includes talented and driven employees who share the same goals.
