SHAIR PRODUCTS

SHAIR PLAY HEADPHONES

Headphones no longer have to represent a "solo experience". Share the music with Shair Play Headphones

SHAIR LIFE BATTERY

Powerbanks have become an increasingly prominent accessory to smartphones. Shair Life Battery introduces wireless charging which allows you to share battery life with everyone around you.

AQUA PRODUCTS

AQUAM

AQUAM is an ecofriendly solution to expensive water bills. With AQUAM you can collect clean filtered water straight from the atmosphere

VELMA

Say goodbye to wasteful showers and say "hello" to VELMA, an ecofriendly smart shower that helps you save water and money

Company summary:

Imagination Inc. Summary:

Imagination Inc. was founded in 2011. our company is like our home, we all treat each other like family, we understand each other and we understand ourselves. Our jobs here in *Imagination Inc.* is to help each other communicate our development and progress in the company.

As *Imagination Inc.*, we are determined to deliver our products to the world to create a healthier and efficient environment. Our goal is to find products that young adults and families would like to buy, that are ECO-friendly for the environment which will inevitably help save lives. Our product *AqUAM* has the ability to save lives in times of a drought. Such as in locations like California and Arizona where our product would help collect humidity in the air and turn it into drinkable water. Our product can help the environment by reducing the amount of plastic water bottles being used daily and reducing pollution, resulting in consumers purchasing *AqUAM* for their water supply instead of constantly purchasing new water bottles.

Our advantages in being a corporate company is that we have to opportunity for partnerships with other firms helping us to become the biggest diverse organization. When having a partnership the shareholder may only be liable for their amount that is being invested. However, our disadvantage will be that we may have doubled taxation and other taxes may require substantial paperwork.

In Overall, we see our company creating more environmental friendly trends to pass down to the following generations among us. We want to demonstrate to the other firms that we are here to deliver what we have to offer for them from our growing company.
