Company Letterhead and Description

crumbConnect is a dessert delivery service that allows customers to receive a customized dessert package with their selected favorite sweets. Tailored to the customer's unique needs, we provide specifications such as dairy-free, gluten free, vegan products, and much more. We partner with local bakeries in order to promote small businesses. Customers can scroll through our website to get a behind-the-scenes look and learn more about some of the bakeries that provide them with their favorite desserts. Depending on their preferred subscription service, customers will receive their favorite desserts shipped conveniently to their doors monthly; saving them the time and hassle of constantly going to local shops to pick them up. Our goal is to make the most intuitive platform in order to bring an individualized and personal dessert experience right to the customer's door.
