Company letterhead and Company Description

VidaTech is a startup company whose objective is to help people who suffer from diabetes and high blood pressure to maintain their condition with relief and comfort. We are also working with local health providers, such as Kaiser Permanente, to minimize the percentage of people having to end in an emergency. We have created an innovated sleek watch that replaces the diabetes monitor with an easy to access test strip storage. VidaTech also created a test strip that comes with a pricker, to give the person an easier way to do daily checkups. The watch also comes with a heart rate monitor for high blood pressure. It brings awareness of the client's medical condition without it limiting their freedom. VidaTech cares for the community and has a passion and desire to help everyone. Remember, knowledge is power. Let VidaTech bring more Vida into you.
